

Combined Gmail job application inventory — updated deep pass

This version folds in an additional deep Gmail search that went farther back in time and surfaced older confirmation / status emails from both Gmail mailboxes involved in this conversation.

Mailbox	Clear named applications	Notes
aes903@nyu.edu	60	Original NYU Gmail inventory plus older deep-pass additions.
angelesuero2@gmail.com	52	Original second Gmail inventory plus older deep-pass additions.
Combined clear total	112	Ambiguous, incomplete, housing, financial-product, and generic no-role records are excluded from the clear total.

Included in the clear total: distinct job or internship applications with a surfaced employer and role name, supported by a Gmail confirmation, interview note, status update, or rejection email. Excluded from the clear total: school marketing, apartment or lottery records, loans/insurance, generic reminders for incomplete applications, and confirmations that do not reveal the role name clearly enough to dedupe with confidence.

Section 1 — NYU Gmail inventory

Mailbox searched: aes903@nyu.edu | Clear applications listed: 60

#	Employer	Role	Evidence
1	Anthropic	Support Operations Analyst	Confirmation / status

50	The Flyover	Writer	Confirmation
51	Universal Music Group	Administrative Assistant, Production	Confirmation
52	PSEG	General Clerk	Status / rejection

Appendix — held out from the clear total

Source	Why it was held out
New Jersey Performing Arts Center (2 emails)	Generic thank-you notes confirmed receipt of a resume but did not expose the role name.
New Jersey Courts (multiple emails)	Application receipts were found, but the surfaced emails did not show role titles and could not be deduped confidently.
ScreenRant	Application-received email did not surface a role name clearly enough to count with confidence.
POSH DJs	Interview-step email referenced an application but did not surface the role name clearly.
UnitedMasters Translation (2 emails)	Confirmations were found, but the role wording in the surfaced email was too unclear to classify confidently.
City of Newark, Division of Arts and Cultural Affairs	Submittable confirmation named the organization but not the role title.
Macmillan — Editorial Assistant, First Second and 23rd Street Books	Email said the application remained incomplete pending data-review consent; not counted as a clean completed application confirmation.
Book of the Month / CBR / IT By Design / TED reminder emails	Saved or incomplete-application reminders, not completed submissions.
Housing / apartment / lottery records, SoFi / Avant / Prosper / Klarna, and similar financial-product emails	Not employment applications.
80,000 Hours advising	Application to an advising program rather than employment.

Search context: this updated report reflects the original Gmail passes plus a later deep pass that continued farther back through surfaced Gmail application-related emails on March 24, 2026. This remains a practical working inventory rather than a forensic archive, so it can still undercount applications that never generated an email or used wording outside the search patterns.

Final deep-pass addendum — Gmail job application inventory

This addendum appends older application-related emails surfaced after the prior combined inventory (v2). It preserves the same counting rules: a clear employer and role name, backed by a confirmation, interview note, status update, or rejection email. Generic incomplete reminders, school marketing, housing, loans, and role-less receipts are still held out.

Mailbox / source	New clear additions	Notes
aes903@nyu.edu	37	Older 2024 confirmations and status emails not listed in v2.
angelesuero2@gmail.com	30	Older 2024 confirmations and status emails not listed in v2.
angelesuero@a-e-space.info	0 unique named additions	Surfaced duplicate confirmations already represented in v2 plus one New Jersey Courts receipt with no role name.
Updated combined clear total	179	Prior v2 total of 112 plus 67 newly identified clear additions in this addendum.

Counting note: this remains a practical Gmail-based inventory, not a forensic archive. It can still undercount applications that never generated emails, and it can slightly over-separate generic Indeed-confirmation records when the surfaced email does not reveal the employer.

Section A — New additions from aes903@nyu.edu

Older NYU Gmail items found after the v2 cutoff.

#	Employer	Role	Evidence
1	Spotify	2024 Summer Internship, User Research (New York City)	Confirmation
2	Spotify	2024 Summer Internship, US Editorial Music (New York City)	Confirmation

28	Indeed	Apprentice Diesel Technician Mechanic (314)	Confirmation

#	Employer	Role	Evidence
29	The Music Studio	Administrative Assistant	Confirmation
30	Indeed	Assistant Archivist	Confirmation

Appendix — held out from this addendum

These items were reviewed in the final pass but not added as new clear entries.

Source	Why held out
angelesuero@a-e-space.info	Education Law Center confirmation, UMG Tech Support Analyst, and UMG Specialist Content Creation were duplicates of roles already represented in v2; New Jersey Courts receipt still did not expose a role name.
IAG / Independent Artist Group	Surfaced emails conflicted between "Agency Trainee" and "Summer Intern - New York" wording, so the role was held out rather than guessed.
Syska Hennessy Group	Rejection email surfaced the employer but not the role title clearly enough to classify confidently.
Industrial Bank	ADP thank-you email confirmed an application but did not surface the role title.
Role-less LinkedIn sent/reminder emails	Several older LinkedIn sent/reminder messages named only the employer and not a stable role title, so they remain excluded.

Appendix - Confirmed outbound resume / transcript outreach emails

This appendix adds confirmed Sent-mail outreach messages that matched a resume / transcript / CV attachment search. These are separate from the application confirmations and rejection records in the main inventory.

Confirmed outbound messages added 54	Included Sent emails to companies, orgs, recruiters, museums, venues, media, and public institutions with attachments and application-material context.	Excluded Self-forwards, recommendation requests, replies without attachments, and clearly non-job material.
